Musselburgh Area Consultation

Whole Town

Tuesday 8th March, 2022
10am to 8pm
The Brunton Theatre, Venue One

The Council and Project Team will be holding a further consultation for the whole town this March at The Brunton Theatre. The Project Team and partners will be available from 10am – 8pm to introduce you to the Scheme, answer your questions and listen to your thoughts.

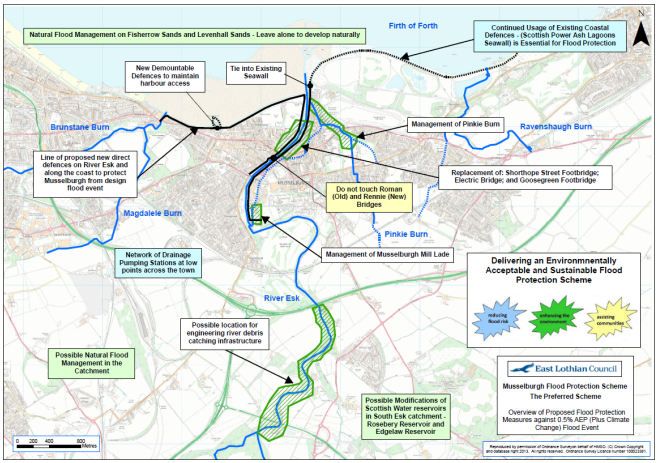

Please note that this event will be a drop-in session, there is no need to attend for the whole duration and we would encourage those with children to bring them along. If you require any adjustments in order to participate please contact us ASAP at musselburghfps@eastlothian.gov.uk.

Developing an Outline Design

What is the 'Outline Design'?

The Project Team have not yet begun designing the Scheme. Currently consultations are ongoing to understand both what is possible and what is desirable. It has been confirmed that physical defences are required along the coast and the river corridor to protect Musselburgh. The alignment, form, finish, and the blending of them into the existing landscape are still to be developed.

Overview of Flood Risk Reduction Concepts

We want to hear from you

The 'Preferred Scheme,' approved in January 2020, is a concept and has served as a starting point for the Project Team to consult with the town on the design. It has already evolved significantly, and we want you to join us in continuing to shape a flood protection scheme best suited for Musselburgh and its community. Please join us March 8th to have your say.

Musselburgh Active Toun

Following support from the public, the Scheme is proposing to work in partnership with the Musselburgh Active Toun (MAT) project where the two overlap. The MAT team will be on hand on March 8th to discuss the ways in which we can introduce new and improved spaces for walking, wheeling and cycling in Musselburgh, and how these might be delivered together with the Scheme to create one newly enhanced landscape for Musselburgh.

The MAT aspires to achieve the following:

- An enhanced environment with great public spaces for all
- A high-quality, safe, and accessible active travel network
- An enhanced local economy, including tourism
- The sustainable growth of Musselburgh's transport network for the future
- Community-led decision making
- Improved equality, health, well-being and choices for those living, working and studying in Musselburgh

In working together the two projects hope to deliver maximum benefit for the people of Musselburgh whilst safeguarding Council resources.
